AAL's Liner Services division operates scheduled and reliable sailings between Asia and Australia and North America's West Coast, linking major ports and shipping hubs.

Harnessing AAL's highly flexible A-Class (31,000 DWT) and S-Class (19,000 DWT) vessels, these liner services can accommodate the exacting transportation demands of heavy lift and project cargo, alongside breakbulk and dry bulk cargo.

AAL has proudly served the transportation needs of the world's most dynamic and demanding industries for over 20 years, including renewable energy, oil & gas, mining, forestry, leisure, agriculture and construction.

Our single-minded vision is to be the best at what we do and create sustainable growth and have an unparalleled reputation for trust and service.
